

# Google Cloud and Liferay: Better Together

**Unify, accelerate, and elevate your digital world.** Liferay DXP on Google Cloud is your unified platform to build, manage, and scale exceptional digital experiences. By integrating Liferay's robust DXP capabilities with Google Cloud's scalable infrastructure and AI, organizations can streamline operations, enhance customer engagement, and drive business growth.

According to a survey by Forrester Research, 75% of organizations struggle with managing and integrating their growing number of digital tools, leading to increased costs and reduced efficiency.

## Modernize your Digital Ecosystems

Enhance user experiences by **unifying disparate applications**, websites, and legacy systems under a modern platform.

## Accelerate your Digital Transformation

Google Cloud is **pre-configured and optimized** for Liferay DXP. Free your IT teams of the intricacies of configuration, deployment settings, or cybersecurity.

## Empower your Business with Digital Agility

Liferay DXP on Google Cloud gives you greater digital agility with a **cloud-native, low-code, AI-ready** platform to build your digital future faster.

## Streamlined Operations

Access Google Cloud Marketplace for **integrated billing** via a single commercial enterprise agreement.

## Effortless Integrations & Flexibility

Liferay's flexible architecture allows a smooth integration with both your current systems and the full suite of Google Cloud services (BigQuery, CloudSQL, etc.). This streamlines deployment and management, making it easier for you to leverage the power of Google Cloud within your Liferay environment.

## Ready to start your journey?

Reach out to our sales executives to explore how we can help you accelerate and unlock your Liferay platform.
